

HANGALA CAPITAL ABSOLUTE BALANCED FUND A1

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund aims to return CPI + 5% per annum over a full market cycle with less capital risk than the average balanced fund. The Fund is Regulation 13 compliant and at least 45% is invested in Namibian assets.

INVESTMENT PROCESS

The Fund invests in a diversified portfolio including cash, capital markets, equities and property, with active asset allocation. Derivatives can be utilised to reduce downside risk when pricing warrants this. The equity selection is active. The Fund is well diversified globally and the offshore allocation and currency exposure is managed actively.

WHO SHOULD INVEST

The Fund is suited to investors with a medium to long term investment horizon, who are seeking capital growth, and downside volatility management.

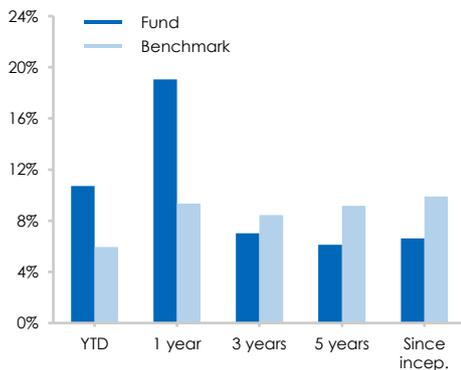

RISK INDICATOR DEFINITION

These portfolios typically have moderate equity exposure and exposure to offshore markets which may result in capital volatility over the shorter term. They are managed in such a manner that the probability of double digit capital losses over one year periods is unlikely. These portfolios typically target returns in the region of 4% - 5% above inflation over the long term.

FUND COMMENTARY

In determining asset allocation positioning, Prescient evaluates current (not forward looking) valuations, sentiment, monetary policy and whether the economic environment is currently conducive to growth. All of these factors are assessed using released quantitative metrics. The July mass looting will in time filter through into company results, sentiment indices and economic data releases. Most retail and real estate companies are in some way detrimentally affected, with estimates of damages running towards R35 billion (impacting GDP) and rising. Business sentiment is likely to be severely impacted as well as companies reevaluate the cost and viability of doing business.

Looking at current valuations however reflects a significant surge in resources profitability with the Top 40 Price Earnings ratio now in line with its long-term average and will likely continue to improve as banking shares start to report on interim results which exclude the worst of the covid lockdowns.

Therefore the funds positioning remains largely unchanged at the end of the month.

During July the Top40 surged 4.5%, while preference shares increased by 0.7%, bonds by 0.8% and ILBs by 0.5%. Listed Property was the only detractor, losing 0.6%.

Contributors to performance:

Equity was the strongest contributor to the fund return this month.

Detractors from performance:

Listed property detracted from performance.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STI, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
